

Get knowledge with us!

Ericpol Training Centre specializes in providing world-wide telecom and project management training. 19 years of dynamic business development in global telecommunications market allows us to build training programs meeting the needs of the mobile telecoms operators, vendors of the telecom equipment and service providers.

Our aim is to convey knowledge and skills directly relevant to the needs of you and your business.

Training services

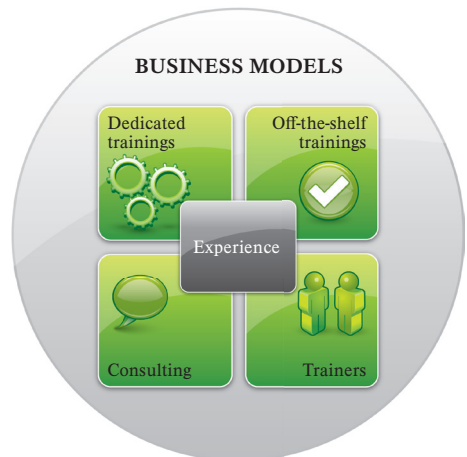

The Ericpol training portfolio includes comprehensive trainings in:

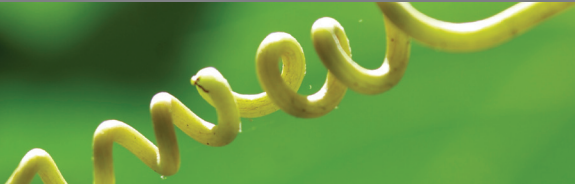

- Telecommunications
- Application development
- Project management

We believe that training is effective only if adapted to customer requirements. Therefore, we always customize our services to make the time spent with us as much effective as possible.

Should it happen that the scope or subject of our off-the-shelf training differs from the expectations of the customer, we can offer **dedicated courses** with the content tailored to your business requirements.

Competence of our trainers and consultants could be also valuable in delivering lectures or presentations created by other companies.

Training Portfolio

On the faith of our experience we can offer a broad range of training options: from one-day management overviews to advanced technical workshops covering different aspects of the telecom industry, applications development and project management. Our portfolio covers:

Our instructors keeps a finger on the pulse of the telecom industry, researching new technologies and standards, updating our existing courses to stay on the cutting edge with changes and the adding new courses.
